

## Required Information

The Wiki assignment for this course involves a great deal of technology usage as well as careful editing and literacy curriculum integration. Please visit Wiki Spaces at <http://www.wikispaces.com/> to get started on developing your personal Wiki and see the Integrating Teaching and Technology site at <http://integratingteachingandtechnology.wikispaces.com/> for an example of an active Wiki.

**Note:** Dr. Comer will provide a separate assignment sheet for other required components of the Wiki assignment.

## Overall Purpose/Goals of Assignment

- ☐ The goals for this assignment are multi. Briefly, general goals I have for you are to:
  - Develop an appreciation for various types of Web 2.0 technologies and levels of literacy
  - Recognize the connection between literacy and technology
- ☐ Brief Description:
  - This assignment involves the development of a wiki as well as individual pages for the wiki. The pages will focus primarily on, though not exclusively, strategies, research and lesson planning.
- ☐ Rationale:
  - The overall purpose for this assignment is to encourage growth as a literacy educator. Through completion of this assignment you should have a clearer picture of literacy integration and lesson planning. You will also gain valuable experience with incorporating technology into teaching methodology.

## Audience

- ☐ Please design your Wiki with teachers and educators in mind. It should be free of jargon and relate directly to this population's needs and interests.

## Sources and Documentation

- ☐ All sources should be listed in the APA documentation style. You may visit the Purdue Online Writing Lab at <http://owl.english.purdue.edu/owl/resource/560/01/> for guidance.
- ☐ You need, if applicable, to include a bibliography, webliography, and a works cited page

## Evaluation Criteria

- ☐ The point value for the assignment is embedded within separate Wiki page assignments. Note: the total assignment constitutes 40% of your final grade.
- ☐ Feedback will occur periodically through online comments, conferencing, pairs, and group input

## Formatting

- ☐ Create a title for your Wiki; an Introduction page (Home) describing, briefly, the purpose of the Wiki and provide your name and other pertinent assignment info; subsequent pages on the Wiki should relate directly to the different assignment requirements (see separate sheet).
- ☐ Consider the design of your Wiki and make it suitable for and inviting to the targeted audience
- ☐ Post your wiki link on the course wiki and send an invitation to join your wiki to Dr. Comer at [mcomer@tnitech.edu](mailto:mcomer@tnitech.edu).
